PROJECTS

DATABASE OF NBA CHAMPIONSHIP GAMES (FALL, 2021) FLORIDA POLYTECHNIC UNIVERSITY, LAKELAND, FL
- Analyzed statistical data from NBA championship games to identify patterns and trends.
- Utilized r in RStudio to perform data analysis and visualization.
- Developed a comprehensive database to store and manage game statistics.

PORTFOLIO WEBSITE
- Designed and developed a personal portfolio website to showcase my interest, skills, and project.
- Utilized HTML, CSS, and JavaScript to create an interactive and user-friendly interface.
- published the website on GitHub pages to make it accessible online.

GID APP
- Developed a full-stack to-do list application for managing tasks efficiently. The app allows users to add, edit, and delete tasks, as well as mark tasks as completed. Implemented both frontend and backend functionalities.
- Utilized next.js, HTML and CSS for the frontend; strapi for the backend.
- Published on Vercel.
